COMPANY PROFILE

# The platform company behind the complete **GRC suite.**

Ridisa unifies Governance, Legal, Risk & Compliance on one Microsoft 365-native platform — one spine of workflows, in-tenant AI and an audit-grade trail, powering every solution, starting with DocBrilliant.

## WHO WE ARE

# One platform for the entire GRC mandate

The same shared platform powers Governance, Legal, Risk & Compliance — 17 products across four pillars, every one native to Microsoft 365. Built on the proven foundation that already serves real customers in production.

**17**

Products across the suite

**4**

GRC pillars on one platform

**100%**

Microsoft 365-native

**7-yr**

Audit-grade evidence trail

## THE BIGGER PICTURE

**1**

### Proven foundation

DocBrilliant runs policy management and compliance attestation for real customers on Microsoft 365 — the proven foundation every Brilliant product is built on.

**2**

### A fragmented market, unified

Governance, legal, risk and compliance are bought as a dozen disconnected tools. Ridisa unifies the whole mandate on a single platform.

**3**

### One shared spine

The same engine — workflows, approvals, attestation, audit trail and in-tenant AI — radiates out to power every new solution. That spine is our moat.

FOUR PILLARS, ONE SPINE

# The Brilliant suite

Governance, legal, risk and compliance are usually bought as a dozen disconnected tools. Ridisa delivers them as one connected suite on a single platform — so a control tested once can satisfy many obligations, and every action lands in one audit trail.

## Governance

### GOVERN WITH CONFIDENCE

4 solutions

How the organisation makes, records and proves its decisions — from the policy library to the boardroom.

## Legal & Compliance

### RUN THE LEGAL FUNCTION

4 solutions

A system of record for the work legal teams do every day — matters, contracts and obligations.

## Risk, Audit & ERM

### SEE AND CONTROL RISK

4 solutions

Connect risks to the policies and controls that mitigate them — and to the audits that test them.

## Compliance & Ethics

### STAY AHEAD OF REGULATORS

5 solutions

Turn obligations into action — and keep the timestamped evidence regulators actually accept.

## THE SHARED PLATFORM

Every Brilliant product inherits the same engine — so each new solution arrives faster, behaves consistently, and reports into one place.

- **Workflows & Approvals**  
Multi-step, parallel, delegation and templates — reused by every module.
- **Audit-Grade Evidence**  
One 7-year, append-only trail and one-click audit packs spanning all solutions.
- **Microsoft 365 Foundation**  
Azure AD sign-in, SharePoint storage and Office Online editing — native.
- **Yara AI**  
An in-tenant AI assistant across every solution — with no data egress.
- **Multi-Tenant & Roles**  
Tenant isolation, role-based access and plan-based feature flags built in.

## Let's talk governance.
